OBJECTIVE

- Engineering Graduate in Computer Science and Engineering with hands on 9+ years of experience in commercial and web application development. Adept at handling end users and have always delivered projects on time.
- Versatile in playing the functional as well as technical role. Contributed both as a team member and an individual player for the employers and possessing 8+ years of experience in AGILE based software development process.

PROFESSIONAL SUMMARY

- Expertise in understanding the Business requirement and Functional specification documents and determining developing scope.
- Expertise in developing responsive emails for various email clients like Outlook, Lotus notes, Gmail, Hotmail, Blackberry and Yahoo.
- Knowledge of cross-browser, cross-platform, page optimization and design constraints on the web.
- Expertise in JS design patterns, OOJS, ES5 & ES6
- Expertise in using JS tools like Jasmine & JSlint.
- Expertise in JS frameworks like Angular, React, Node.js.
- Expertise in debugging using IE developer tool, Yslow and Firebug.
- Have a basic working knowledge on Android APP development using Android Studio.

TECHNICAL SKILLS

Languages	OOJS, Core Java
Web Technologies	HTML5, DHTML, XHTML, XML, AJAX
Web Authoring	CSS3, XSLT, PHP, JSP and Velocity
JS Frameworks	Node.js, Lodash, Underscore, Handlebars
MVC Frameworks	Angular, React
Version Control	SVN, GIT
CSS Compiler	LESS, SCSS & POSTCSS
Unit testing	Jasmine
Platforms	Android Studio
Tooling	Webpack, Express

EDUCATION

Bachelor of Engineering in Computer Science

June 2001 — March 2005

Vel Tech University, Chennai TN

Percentage Obtained – 73%

Higher Secondary

June 1999 — March 2001

St.Mary's Higher Secondary School, Dindigul TN

Percentage Obtained – 86.5%

SSLC

June 1998 — March 1999

M.S.P.S.N.M Higher Secondary School, Dindigul TN

Percentage Obtained – 93.6%

WORK EXPERIENCE

Flipkart.com, Bangalore, India

April 2012 — Present

UI Engineer II

Worked closely with designers to challenge the effectiveness of the UI and dynamically integrate feedback. Built efficient and reusable front-end abstractions and systems. Participate in design and code reviews. Interacting with other team members to incorporate their innovations and vice versa. Analyzed system function and performance requirements to support design concepts.

Associated Northcliffe Digitial, London, UK

April 2011 — March 2012

Web UI Developer

Involved in design and development of the project right from the scratch and followed graceful degradation approach for creating cross browser website with some of the HTML5 & CSS3 features. Also introduced Jasmine unit testing framework for JavaScript BDD testing and involved in developing the IPhone App version of the same product. Different themes of the same website can be seen at http://wowcher.metro.co.uk & http://wowcher.dailymail.co.uk.

Pubmatic India Private Limited, Pune, India

March 2010 — Jan 2011

Senior Web UI Developer

As a 3 member UI team we were responsible for creating a cross browser compatible application and as the company insisted on creating a Rich UI, we have created our custom input controls (like dropdowns, input boxes, date picker etc) and this website includes lots of statistical data presentation using a third party framework called "Amcharts" (like pie chart, line chart, sparks). To achieve better page loading time, we have concentrated in performance measures like CDN, design patterns, image sprites, minified JS & CSS files etc.

Authoria Softwares Private Limited, Bangalore, India

Dec 2007 — Dec 2009

Web UI Developer

Played a major role in gathering the feature requirements, designing prototypes, and then developing the features. Also took care of back-end integration using Velocity. Here I played a vital role in defining the mock-up UI's according to the functional specification and implementing it. Since the product was built initially for IE6 & IE7, we reworked on the design to make it cross-browser compatible in a short period of time. As the application is growing drastically we introduced lots of reusable components to make the code manageable and introduced modernizr and other required Jquery plugins.

Ecweb Softwares, Chennai, India

March 2006 — Dec 2007

Web Developer

Played a vital role in understanding the requirement from the client and designing the pages from the scratch and adding various functionalities like User registration, News display, Product display & Ecommerce operations. As most of these most of these sites are into E- commerce, I worked on data integration with back-end to achieve the E-commerce flow which involved lots of effort in JS, XML & XSLT. It was a very good learning opportunity for me to work with cross browser compatible websites from scratch.

QUALIFICATIONS

- ORACLE Certified Professional Java SE 6 Programmer for the Java 2 Platform 6.0 (SCJP).
